INJ.ENOX 0.4 ML S/C OD

### INVESTIGATION

Attached.

**HRCT OF LUNGS**

**COVID positive status, the present scan shows**

- Multiple patchy ground glass opacities with septal thickening in both lungs in peripheral location involving predominant both lower lobes
  - CTSS 7/25 mild disease
  - Approximate 15-20 % lung involvement
- As compared to previous HRCT dated (05/04/2021), progression of lung involvement is seen
